QUICK DRYING VARNISH STAINS WATERPROOF

These varnish stains are a scientific combination of coloring matter and the highest grade varnish for use on floors, woodwork, wickerware, furniture, etc., producing a rich, durable, waterproof

lacquer in all the popular effects.

DIRECTIONS

New Work—On open grained woods such as oak, ash, chestnut, walnut and butternut, first fill the pores with our Paste Wood Filler in shade desired; close grained woods such as maple, birch and pine, do not require a filler, simply apply this Varnish Stain as supplied. Allow sufficient time to dry hard between coats.

Old Work Previously Painted—Apply a coat of Ground Color, followed by a coat of Graining Preparation, then follow with two coats of our Varnish Stain.

Old Work Previously Varnished—Does not need a ground color, simply apply our Varnish Stain.

New Work—Reed and wickerware—apply Varnish Stain as supplied.

Where two or more coats are to be applied, it is often found desirable to apply only one coat of our Varnish Stain in the color selected and follow with our highest grade varnish.
